PRACTICAL NO. 1

Aim:
To create a Bootstrap Carousel and enhance it using CSS3 animations for attractive visual effects.

Steps:

1. Create an HTML file.
2. Include Bootstrap CDN links.
3. Create a Bootstrap Carousel with multiple slides.
4. Add carousel captions containing headings and paragraphs.
5. Apply CSS3 animations using @keyframes.
6. Run the webpage in a browser and observe the animation effects.

Code:

```
<style>
    .carousel-caption h3{
        animation: slideDown 1s ease-in-out;
    }

    .carousel-caption p{
        animation: slideUp 1s ease-in-out;
    }

    @keyframes slideDown{
        from{
            opacity:0;
            transform:translateY(-50px);
        }
        to{
            opacity:1;
            transform:translateY(0);
        }
    }

    @keyframes slideUp{
        from{
            opacity:0;
            transform:translateY(50px);
        }
        to{
            opacity:1;
            transform:translateY(0);
        }
    }

    .carousel-item img{
        height:500px;
        object-fit:cover;
    }
</style>
```
