PRACTICAL NO. 6

Aim:
To develop an AngularJS Form Application that demonstrates various AngularJS events and performs form validation.

Events Used:
ng-click
Executes a function when a button is clicked.
ng-change
Triggers when the selected course changes.
ng-focus
Triggers when the cursor enters the Name field.
ng-blur
Triggers when the cursor leaves the Name field.
ng-mouseover
Triggers when the mouse pointer moves over the heading.

Code:

```
<!DOCTYPE html>
 <html ng-app="formApp">
    <head>
         <title>AngularJS Form Application</title>
         <script
src="https://ajax.googleapis.com/ajax/libs/angularjs/1.8.2/angular.min.js"
></script>
         </head>
         <body ng-controller="formController">
            <h2>Registration Form</h2>
            <form name="myForm"> Name: <input type="text" ng-model="name"
ng-focus="focusMsg='Name field selected'" ng-blur="blurMsg='Name field
left'" required>
                <br><br>
                 Email: <input type="email" ng-model="email" required>
                 <br><br>
                 Course: <select ng-model="course"
ng-change="changeMsg='Course Changed'">
                    <option value="">Select Course</option>
                    <option>MCA</option>
                    <option>MSc CS</option>
                    <option>BCA</option> </select>
```

```
                    <br><br>
                    <button type="button" ng-click="submitForm()"> Submit
</button>
                  </form>
                  <p>{{focusMsg}}</p>
                   <p>{{blurMsg}}</p>
                    <p>{{changeMsg}}</p>
                    <h3 ng-mouseover="mouseMsg='Mouse Over Event
Triggered'"> Move Mouse Here </h3>
                     <p>{{mouseMsg}}</p>
                      <p>Name: {{name}}</p>
                       <p>Email: {{email}}</p>
                        <script>
                         var app = angular.module("formApp", []);
                         app.controller("formController", function
($scope) {
                           $scope.submitForm = function () {
                              if ($scope.name && $scope.email) {
alert("Form Submitted Successfully");
                               } else { alert("Please Fill All Required
Fields"); }
                               };
                               });
                               </script>
                                </body>
                                </html>
```
